

BlueCat eLearning Curriculum

TRAINING TO SUIT YOUR NEEDS

eLearning continues to grow in popularity because of its convenience and effectiveness. As a result, our online training offerings are continually evolving to ensure you get the most from your BlueCat solutions.

- Learn at the right pace: complete an entire course in one sitting, or concentrate on one module at a time
- Regular updates: we introduce and update content on a regular basis. Your 1-year subscription provides access to these updates
- Easy to consume: task-based videos and software simulations provide a rich multimedia experience
- Eligible for certification: those enrolled in BlueCat Fundamentals - DDI and Support Provider courses get access to the certification exams
- *All eLearning courses are offered as a one-year subscription*

eLearning is a great choice for:

- New users and administrators on your team
- Existing staff who may have completed the original training, but need a refresher on the product or the newest features
- Preparing for BlueCat certification

BLUECAT FUNDAMENTALS

BlueCat Fundamentals focuses on the administration of the BlueCat Address Manager solution and the core network services provided by BlueCat DNS/DHCP Server™. The course assumes that attendees have a general understanding of networking concepts as well as a strong grasp of DNS, DHCP and IPv4 addressing.

IPAM ESSENTIALS

Created for networking professionals, this course provides a functional understanding of the BlueCat Address Manager system and focuses on system navigation and the provisioning of IPAM objects, notably static IP addresses, DNS resource records and DHCP reservations. The BlueCat video library is included with all IPAM Essential eLearning subscriptions. IPAM Essentials subscriptions are available for individual users or you can purchase a site license to cover your entire organization.

BLUECAT SUPPORT PROVIDER LEVEL I

This essential training course was created for technical analysts with a desire to provide Tier One support for the BlueCat Address Manager and BlueCat DNS and DHCP Server solutions.

BLUECAT VIDEO LIBRARY

As video is such a powerful tool for learning, we've created a series of learning videos that provide "just-in-time" learning showing you how to perform various DNS, DHCP, and IPAM related tasks. The library contains over 70 videos with more added every month. Access to the video library is included in BlueCat Fundamentals and IPAM Essentials subscriptions.

BLUECAT CERTIFICATION

BlueCat Certifications are designed for DNS, DHCP, and IPAM administrators who have proven their proficiency in BlueCat technologies. BlueCat offers three certifications, BlueCat Fundamentals Certified Professional (BFCP), BlueCat Advanced Certified Professional (BACP), and BlueCat Support Provider Level I (BCSP).

Contact your BlueCat sales representative today to register for the training courses that meet your team's needs.
