

# Bluecat Expert

With over twenty years of experience in the business, BlueCat's subject matter experts are the masters of DNS. We've seen just about everything, and tap into that wealth of knowledge to make your DNS perform at the highest level.

## Let our expertise become your expertise

Deploying and integrating any core network infrastructure service can be complicated. That's why BlueCat's consultants and engineers are here. We help you cut through the complexity with a proven process based on achieving your operational goals.

### DNS Architecture Workshop

Determine requirements, develop a deployment architecture, map out a migration strategy.

### Operational Training

Learn how to administer and operate BlueCat solutions

### Service Point Deployment

Document and deploy an initial set of service points to begin handling DNS client load

### Security Policy Creation

Build and configure custom Intelligent Security policies

### DHCP Client Cut-Overs

Migrate clients to BlueCat service points

### Namespace Configuration

Build and configure Intelligent Networking policies

## Reduce DNS migration risk

**We get it:** DNS migrations are complex, risky, and stressful. That's why BlueCat provides white-glove migration services to cleanse your data, plan your cut-overs, and ensure that everything is aligned.

### Architecture Development

Determine requirements for every integration and automation point

### Migration Strategy

Develop the appropriate migration strategy based on your infrastructure, goals, and network toolset

### Project Execution

Work hand-in-hand with BlueCat on every step of your migration: data extraction, transformation, clean-up, optimization, testing, and cut-over.

## Unleash Your DNS

Stop counting boxes. Stop paying for unused capacity. Get the capabilities you need, when you need them. DNS Flex is a subscription-based offering which delivers the capabilities you want at the scale you require.
